

## EAR CLEANING GUIDE

### PROCESS

1. Apply cleanser to ear liberally as shown or by soaking a cotton ball and placing it in the ear.
2. Massage into ear canal by gently massaging the base of the ear.
3. With a cotton ball over your fingertip, wipe the accessible portion of the ear clean. Let your dog or cat shake out any excess. Clean the same portion of the ear with a dry cotton ball once again. Repeat if necessary.
4. Apply the medication deeply into the ear canal.

### TIPS FOR SUCCESS

- **Do not insert cotton swabs into the ear canal.**
- Use cotton swabs only to clean the parts of the ear you can actually see.
